

BioVectra continues aggressive investment plan with new facility acquisition, and fermentation capacity expansions.

Charlottetown, PE \square May 29th, 2015 - BioVectra Inc. is a Canadian-based contract development and manufacturing organization (CDMO), with an impressive track record of long-term API supply and a strong quality history. The company continues to invest in its core competencies, fermentation and downstream processing capacity. Planned investments to the end of 2015 are in the range of \$30M, including the following highlights:

1. Acquisition of the former Sepracor API production facility located in Nova Scotia, Canada
2. Installation of an additional 30,000L fermentation capacity
3. Installation of \$5M in improved downstream purification equipment to support existing fermentation capacity with specialized capabilities in potent intermediate and API purification processing
4. Investment in new pre-clinical fermentation and potent chemistry suites

BioVectra has demonstrated its ability to deliver high-quality, custom manufacturing services and specialized MPEG reagents to many of the top pharmaceutical companies operating around the globe. By employing flexibility, transparency, and responsiveness in its service delivery to clients, it has formed and utilized several unique models in supply and co-development partnership.

\square We will continue to be a strong partner of choice for companies developing specialized therapeutics, and offer a range of capabilities, including handling complex molecules, potent API \square , MPEG reagents, conjugation chemistries, and small and large molecules produced from microbial fermentation from early development stage on through to commercial supply \square stated Heather Delage, Vice President, Business Development for BioVectra.

Come and visit BioVectra, and our key executive and Business Development Leads at CPhI Worldwide 2015, October 13-15, 2015 in Feria de Madrid, Spain, Hall 7 Booth 7G80, and learn more about our expansion plans.
